

We love dealing with our local ISP. It is always a pleasure to call them if we have an issue. They ANSWER the phone. We are not sent into telephone hell waiting for help. They are right here--locally. I'm not calling someone in Texas or worse. I don't want to have to deal with SBC/Yahoo, Bellsouth or any other phone company. I don't want to be forced to install all of their programs on my computer and then PAY them for internet access. It's MY computer!!!! Just give me the service I'm paying for! I don't want all that other junk they MAKE you install. My local ISP gives me the service I'm paying for without taking over my computer. Please don't let the BIG guys push my ISP around. We already know how the big phone companies slam long distance subscribers. Don't let them do the same with internet.

Thank you for listening

Eric
